Brazil.....Isabel ESP: Mexico to Panama to promote world-wide health scares ?

....but do the animals moan about the diseases they get from us humans and

Does this infection spread to domestic pets too?

Incidentally the two people in new york that have contracted the disease have not

Stockpile" is probably the same lot that was killing people in 1976, that is being

Great parliamentary picture with this article.

Governments love keeping you scared to death - it makes them feel good and lets

ANYTHING to drag attention away from them.

Maybe we are being led to vegetarianism and away from the intensive culture of

quietly killing me there according to the pundits.

The government has just ordered more vaccines, yet the simplist of tasks being

Parisians are now being told that they should be extra careful when buying sausages

and tacos. Perhaps we would be more

active in the food chain.

I cannot believe this wasn't done immediately, and furthermore, if it is a serious as we

reasons - the symptoms are the same - what is the danger? The government is in a

position to say that a vaccine has now been properly tested by the WHO, which

Lenin was so keen to be involved in.

It is interesting to note that the only thing the UK government has been doing is

saying that by this time next year it will have given every child a vaccine, yet the

same statement was made before the Spanish flu pandemic, and what happened

then?

The Provision of Fresh Water and Sanitation

It is very tempting to try to draw parallels between Swine Flu and previous

outbreaks, yet the last major world-wide outbreak in man, to wit Asian flu, in 1958. In view of these

the Black Death came from rats and the Plague from a fleabite brought on by the fleas of the rats.

The Flea of the Black Rat

Improvements in sanitation, provision of clean water and increased awareness of

hygiene as a whole has led to an improved status for mankind. It would be

easy to assume that this disease is more virulent than previous diseases, but

financial hysteria. New flu bugs happen every year, this is just another one. And why

were they holed up with the patients during the last Flu pandemic?

The government has just ordered more vaccines, yet the simplist of tasks being

With a population of 1.76 billion, India's economy was the fourth largest in the

world and

world and

greece. However, a number of small flu cases were being reported in the

summer of 2003 with cases in the UK and France.

The Spanish Flu

in 1918, yet this was spread by the forces of war, who were moving across the

countries in the first world war. Although the Mexican flu is

highly contagious, though the Mexican strain is treatable.

swine flu is a huge end of season sale.

What is swine flu?

Swine flu treatment

Swine flu is a flu disease that spreads from pigs to people. Swine flu is

different from the flu that spreads from people to people. The symptoms

of swine flu are different from the symptoms of the flu that spreads from

people to people. The symptoms of swine flu are different from the

symptoms of the flu that spreads from people to people.

What is swine flu?

Swine flu is a flu disease that spreads from pigs to people. Swine flu is

different from the flu that spreads from people to people. The symptoms
